Statement on Genetically Modified Organisms (GMO's)

Sensus Operations C.V. produces and markets Frutafit[®]inulin and Frutasun[®]high fructose syrup, based on inulin, extracted from chicory roots.

All suppliers cultivating chicory for Sensus Operations C.V. are contracted and obliged to use chicory seed that is delivered by Sensus. The chicory seeds are delivered to Sensus are GMO free. Certificates from Seed producers are available.

Furthermore no ingredients or process aids of GMO-origin are used in the production process of Frutafit[®]inulin and Frutasun[®]high fructose syrup.

Sensus can therefore state that Frutafit[®]inulin, Frutalose[®] and Frutasun[®]high fructose syrup **are not GMO based ingredients**. This statement complies with the EU's Directive 90/220/EEC on GMOs.

As a result of the above mentioned, no labelling as a GMO derived ingredient for application of Frutafit[®]inulin or Frutasun[®]high fructose syrup from chicory roots is required according to EU Commission Reg. 1829/2003

A handwritten signature in blue ink, appearing to read "Eliane Waterschoot", written over a horizontal line.
